

Sunnica Webinar – Repeat of Introducing the Consultation Webinar (24/10/2020), answers to unanswered questions

During the webinar it was not possible to answer all of the questions asked. Answers to any unanswered questions are given in this document.

Permissive routes need to be closed for a period of a year or the landowner will lose their rights under adverse possession. How are you committing landowners to this for a period of 40 years?

Sunnica's approach is to secure the use of permissive paths through the property agreements that it is negotiating with the relevant landowners. We do not believe that any landowner will lose their rights under adverse possession as this process requires conditions of control that will not be met by users of the permissive routes.
